# TOOLS AND EQUIPMENT NEEDED FOR LEATHER SHOE MANUFACTURING

## 1. Cutting Tools

- Specialized knives, scissors, and die-cutting machines are used to precisely cut the leather and other materials.

## 2. Sewing Machines

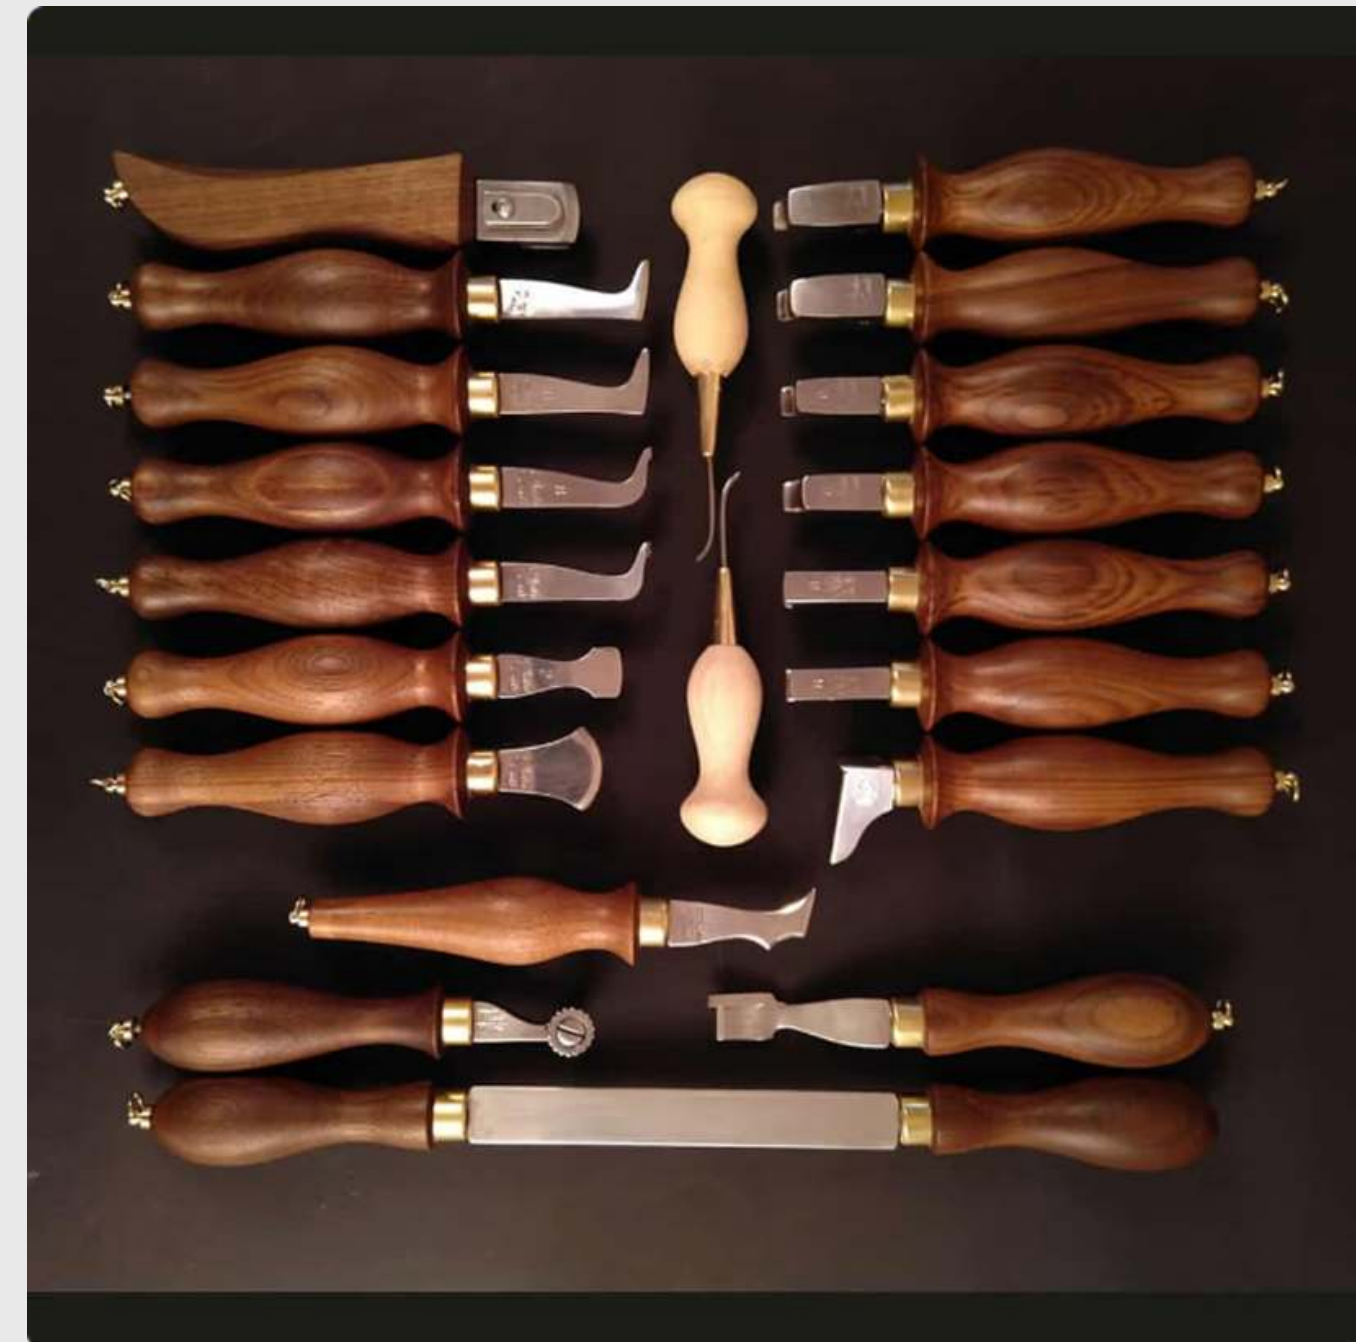

- Industrial sewing machines are used to stitch the various components of the shoe together.

## 3. Lasting Machines

- These machines help shape and form the shoe around a last, or foot-shaped mold.

## 4. Finishing Tools

- Tools like hammers, brushes, and buffers are used to polish, shine, and add the final touches to the shoes.
